

Celebrating Students' Success

FTMSGlobal 29th Convocation Ceremony

26th November 2017 • Kuala Lumpur Convention Centre (KLCC)

Congratulation Message from Principal

Dr. Sajjal Divakaran

It gives me great pride to congratulate all graduates on their success.

I also give my sincere thanks and appreciation to all who have contributed to the success of the graduates by providing the necessary support financially, physically and emotionally.

I sincerely hope that all enjoy this special day with us.

With every good wish.

The FTMS Malaysia 29th Convocation Ceremony was held on Saturday 25th November. The venue for this important event was again the Kuala Lumpur Convention Centre (KLCC) where almost 2,000 guests, students and VIPs were in attendance.

The Convocation Ceremony was for FTMS students who had successfully completed their programmes of study in Malaysia.

Representation from partner universities was provided by Professor Iain Martin, Vice Chancellor, Anglia Ruskin University, Dr Trevor Bolton, Pro Vice Chancellor (Partnerships), Anglia Ruskin University and Professor Hassan Abdalla, Pro Vice Chancellor, University of East London who conferred degrees and congratulated their students and spoke to the assembly.

FTMS senior management present included Mr. Balbeer Singh Mangat, Founder and Group CEO of FTMSGlobal, Datin Sabariah Abdul Karim, Chairman, FTMS Malaysia, Dr. Sajjal Divakaran, CEO and Principal of FTMS, Malaysia, Mr. Trevor Ward, Academic Manager, FTMS Malaysia, Dr. Mohammad Adam Bakar, Dean, Academic, FTMS Malaysia, Mr. Tan Kee Haow, Head of Quality Assurance, FTMS Malaysia, Mr. Zubair Hassan, Head, School of Accounting, Business and Management and Mr. Zainudin Johari, Head, School of Engineering and Computing Sciences.

During the ceremony over 500 students received their scrolls and were congratulated on their success. Of special note was the graduation of almost 200 students who received their certificates for successfully completing the Anglia Ruskin MBA programme.

Across the Diet 37% Masters graduates achieved distinction or merit, 10% Bachelor graduates achieved first class degrees with a further 70% achieving second class degrees. These results are comparable with those achieved by students who study for the same degrees in the UK. This is a reflection of their application to their studies and the skill and commitment of the faculty at FTMS.

Taking diploma and degree awards together Anglia Ruskin University accounted for some 54% of all the course awards conferred, or 63% of degrees. About half of these were the very popular ARU MBA which has the attraction, especially for those who are already in work, that student assessment does not involve written examinations. Also popular are ARU first degrees in HR Management, International Management, Marketing, Accounting & Finance and Business Management.

The University of East London has proved popular with students at Masters and first degree levels for the degrees of Business Information Systems, Computer Systems Engineering, Computer Networks and Software Engineering.

During the Convocation awards were made to mark exceptional performance to the best of FTMS Malaysia students as follows:
